Welcome to the Textile Course

Textile Technology

The course is designed to offer a general overview of each of the processes which textile articles undergo during manufacture.

OBJECTIVES: to gain an in-depth understanding of each of the processes that textiles undergo during manufacture and to identify the different subsectors and their principal characteristics. In addition, the student will learn to distinguish fibre and yarn types and the most commonly-used bonding systems, as well as to classify a full range of fabric types, carry out textile finishing processes and gain an understanding of quality control procedures and textile labelling.

The course is designed to appeal equally to unemployed and active textile workers.

TIMETABLE:
Flexible and adaptable to the student.

TUTORING:
On-going and open.

CONTENTS:
- Textile fibres
- Spinning
- Woven structures
- Weaving
- Knitted materials
- Pre-finishing operations
- Dying
- Printing
- Sizing and finishing
- Quality control
- The garment industry
- Textile labelling

COURSE DURATION:
120 hours

The successful student will obtain a diploma accrediting him or her with having completed the course satisfactorily.

AITEX virtual classroom.
